

CURLY-COATED RETRIEVER GSDIIIa DATABASE

Names highlighted in yellow represent curlies whose sire and dam were tested clear of the GSD IIIa gene. Only first generation offspring are listed; no test number is available for these curlies but they are clear of GSD based on the absence of the GSD mutation in both parents.

Names highlighted in purple represent curlies that have been found to be clear of the GSD IIIa mutation BOTH by the absence of the mutation in their sire and dam AND by testing of the individual dog.

CURLY-COATED RETRIEVER GSDIIIa DATABASE

Names highlighted in yellow represent curlies whose sire and dam were tested clear of the GSD IIIa gene. Only first generation offspring are listed; no test number is available for these curlies but they are clear of GSD based on the absence of the GSD mutation in both parents.

Names highlighted in purple represent curlies that have been found to be clear of the GSD IIIa mutation BOTH by the absence of the mutation in their sire and dam AND by testing of the individual dog.
